

# Demand & Supply study of Medicinal Plants

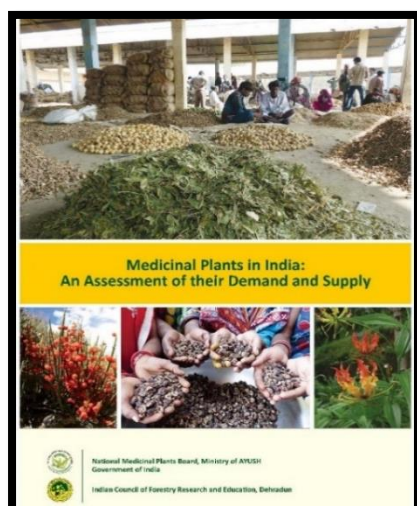

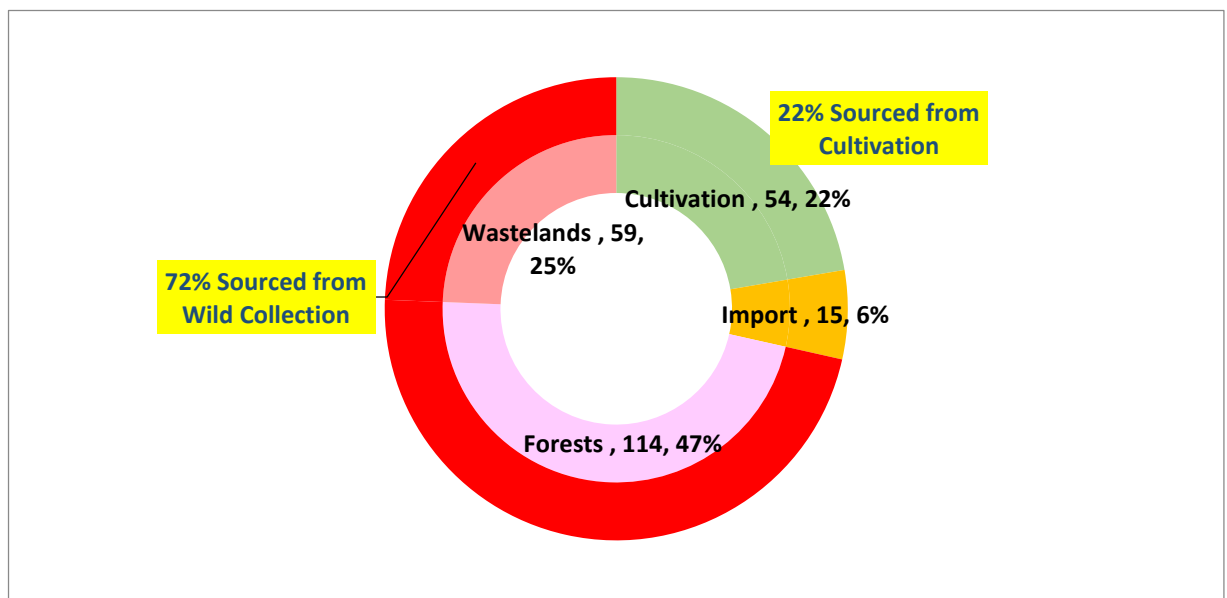

Primary objective of the study:

- Assessment of consumption and supply status of medicinal plants in the country.
- Formulation of strategies for strengthening medicinal plant resource base.

The report presents a detailed account of:

- medicinal plant cultivation and conservation initiatives,
- draws attention towards medicinal plant species of conservation concern and
- brings out a prioritized list of medicinal plants for focused action.

## Source of Medicinal Plant, Cultivation vs Wild Collection

Traded Species

High demand species  
(>100 MT/ year)

Consumption  
(2014-15)
